## 06 PROJECT

Jan 2023 — Feb 2023

### Exopods

**Exopods** - Container Management and Logging Platform

Led the development of Exopods, a web-based container management and logging platform designed to simplify the management and monitoring of Docker containers. Designed with modern, user-friendly features, Exopods enables easy deployment, management, and scaling of containers, ensuring seamless application delivery. Key features include a real-time view of container status, the ability to start, stop, and restart containers, and a search and filter function for logs by container, image, and time. Contributed to the implementation of the latest technology for fast, reliable, and secure container management services. As a result, Exopods has become the ultimate solution for developers seeking simplified and efficient container management and logging services.
